ORGANOCIDE 3-in-1 GARDEN SPRAY READY TO USE - NO MIXING NEEDED

Shake occasionally while using.
Natural products tend to settle if not agitated.

Read entire label before use.
Use only in accordance with label instructions.

Directions: Spray leaves and stems of plants making sure tops and bottoms are covered. Spray until the solution runs off the tips of the leaves. For best results, shake occasionally to keep active ingredients suspended. Spray during the coolest time of the day (early morning or late evening) and allow 3-4 hours for product to dry. Do not apply when temperatures exceed 95°F. A single application is normally enough for control. For normal maintenance, spray once per month or as needed to spot treat areas. For severe problems, make two applications 3 days apart. Reapply in 7 days if problem persists.

Target Pests: Organocide® 3-in-1 Spray kills the eggs, larvae, and nymphs of insects and the adult stages of over 25 soft bodied insects including (but not limited to) aphids, Hemlock wooly adelgid, citrus rust mites, leaf-rollers, mealy bugs, scale insects, spider mites, thrips, whiteflies, and fungus gnats. Organocide® 3-in-1 Spray controls certain fungal diseases such as (but not limited to) powdery mildew, downy mildew, black spot on roses, helminthosporium and greasy spot.

Plant Compatibility: When used as directed, Organocide® 3-in-1 Spray has an unusually high degree of safety to most plants. However, some plants in the Euphorbia family (Crown of Thorns, Poinsettia) have shown some sensitivity. If in doubt, test first on a small area of foliage to determine plant safety.

Warranty: Please review and follow the instructions for the intended use of the product as indicated on the label. Use contrary to label instructions may cause adverse consequences. Since Seller cannot assure that the product will be used consistent with the instructions provided, Seller makes no warranty, express or implied concerning the use of this product.

ORGANOCIDE 3-in-1 GARDEN SPRAY

Listo para Usar - No es Necesario Mezclar

Antes de usar, lea la etiqueta completa. Use únicamente según las instrucciones en la etiqueta.

Agite Ocasionalmente Mientras lo Usa.
Los productos naturales tienden a depositarse si no se agitan.

Efectivo en: Insectos, Ácaros, Escamas, Hongos, como se indica
De efecto leve en: los Insectos Beneficiosos
NO es perjudicial para las Abejas ni las Mariposas.

Instrucciones: Rocíe las hojas y tallos de las plantas, asegurándose de cubrir bien la toda la parte superior e inferior. Rocíe hasta que la solución chorree por el extremo de las hojas. Para obtener mejores resultados, agite ocasionalmente mientras lo usa, a fin de que los ingredientes en suspensión se mantengan activos. Rocíe durante la hora más fresca del día (mañana o tarde en la noche) y permitir 3-4 horas para que el producto se seque. No aplicar cuando las temperaturas superan los 95 ° F. Por lo general, una única aplicación es suficiente para el control. Para el mantenimiento regular, rocíe una vez al mes, o tal como sea necesario para tratar las áreas con manchas. Cuando se trate de un problema grave, aplíquelo dos veces, dejando tres días de por medio entre las aplicaciones. Vuelva a aplicar en 7 días si el problema persiste.

Plagas Objetivo: Organocide® 3-in-1 Spray mata los huevos, larvas y crisálidas de insectos, así como los insectos adultos, en todas sus etapas, de más de 25 insectos de cuerpo blando incluyendo (sin estar limitado a) áfidos, pulgón de la tsuga, ácaros enroñadores de cítricos, enrolla-hojas, gorgojos, insectos en forma de escamas, ácaros rojos, tisanópteros, moscas blancas y mosquitos de hongo. El Organocide® 3-in-1 Spray controla ciertas enfermedades causadas por hongos como (sin estar limitado a) roya polvorienta, roya negra, machas negras en las rosas, helmintosporium y manchas de grasa.

Compatibilidad con las Plantas: Cuando se usa según las instrucciones, el Organocide® 3-in-1 Spray ofrece un alto grado de seguridad para la mayoría de las plantas que es poco común. Sin embargo, algunas plantas de la familia Euphorbiaceae (como corona de espinas y flor de pascua o poinsettia) han demostrado tener cierta sensibilidad al mismo. Si tiene alguna duda, pruebe primero en una pequeña área del follaje para determinar la seguridad específica con la planta.
