

PLANT FOOD

ROOT MAKER®

0.25% CHELATED IRON WITH KELP

FOR USE IN VEGETATIVE
AND EARLY BLOOM STAGES

Net Weight: 2.3 lb. (1.0 kg) • Net Contents: 1 Quart (0.9 L)

ROOT MAKER® Plant Food

Plant Doctor® Root Maker® contains 0.25% chelated iron, coupled with sea kelp, intended for use in the Vegetative and Early Bloom stages.

DIRECTIONS FOR USE • SHAKE WELL BEFORE USE

- Keep nutrient solution below 75° F. (24° C.)
- Maintain nutrient solution pH between 5.5 – 6.5.
- Change nutrient solution every 7-10 days and top off with fresh water between nutrient changes.
- Keep nutrient solution aerated.
- Lessen the risk of overfeeding by knowing your strain's nutritional requirements and by maintaining proper ppm levels for your particular strain. Reduce nutrient strength if plants show signs of stress, or if growing in hot, arid conditions.
- Shake well before mixing.
- After mixing always check your ppm and be sure to adjust pH to a range optimum for your plant strain and media.

RECIRCULATING AND DRAIN TO WASTE PROGRAMS:

VEGETATIVE STAGE — Starting in Week 2. Dilute 1 tsp. (5ml.) per gallon of water. Apply weekly throughout Vegetative Stage.

BLOOM STAGE — Dilute 1 tsp. (5ml.) per gallon of water. Apply in weeks 1-2 of Bloom Stage.

Not for use in organic crop and organic food production.
